HANSEN JAPRI

Business Man & Project Manager

Profile

An early-stage business developer and startup catalyst with a powerful blend of strategic thinking and tactical execution. Experienced in designing operational strategies from scratch, managing end-to-end projects, and driving cross-functional collaboration using an agile approach. Adept at solving complex problems and bridging the gap between business vision and technical development to build innovative, high-market-value products.

Experience

2026
-
Present

Software House Business

Chief Executive Officer, Project Manager, and Backend Developer

- I drive business strategy, manage client relations, and oversee team timelines to ensure timely, on-target project delivery.
- I design database architectures, build secure server-side logic, and develop stable APIs as the core foundation for our applications.

2025
-
Present

UMN Programming Club

Vice President

- Directed social media, web, and contest initiatives via cross-divisional coordination.
- Managed project planning and team leadership to ensure high operational standards.

2025

Top 6 CIMB Niaga Project

Project Manager

- Managed the design and documentation of an e-money top-up feature for CIMB Niaga as Project Manager.
- Developed a technical proposal aligning software engineering principles with corporate digital banking needs.

2026
-
Present

Course Net
